2016 Adolescent Mental Wellness Conference
South San Francisco Convention Center
August 5-6, 2016
Welcome to the 1st Annual Adolescent Mental Wellness Conference! The theme of this conference is Breaking Down Stigma, Building Support for Youth Mental Health. Our goal is to bring together a diverse group of community members and leaders to create greater awareness, understanding and support for youth mental health, and in doing so reduce the stigma surrounding mental illness. Because of this stigma, the challenges that many of our youth and families face are often kept hidden and too many mental health issues remain untreated. There is much work to be done to build additional mental health access, education, and support for our young people and their families.

Recently, concerns about the mental health needs of our young people have been an increasing topic of focus across the Bay Area, the state and the nation. We, at Lucile Packard Children’s Hospital Stanford and Stanford Medicine decided that it was time to expand the community conversation about mental health support. Too often our teens feel ashamed, unsupported, and alone. They do not know where to turn and neither do their families.

We hope this two day conference will be a bridge in expanding this support for our entire community. In an effort to support broad community dialogue, we have developed sessions for youth, families, policy experts, clinicians, and educators. We want this conference to serve us all by increasing awareness and support for building access to mental health care.

We are excited you have chosen to join us in this important endeavor. We hope you are ready to engage with us in exploring integrated, innovative and preventive approaches for supporting the mental health of our youth and look forward to the shared discussion and collaboration.

Thanks so much for your participation!
